

## **Exchange programme with French school in the Pyrenes**

In February and March, a group of 6 students from 2.a and 2.f will participate in the first half of an exchange programme sponsored by the Ministry of Education and monitored by the Danish National Centre of Foreign Languages and Institut Français in Denmark.

The students will spend three weeks in Argèles Gazost in the south of France.

They will be staying with host families and attend school at Lycée René Billères. During their stay, they will have a student from the school as their companion and host. Before leaving for France, they will communicate with their hosts on the French school's site. So far, they have written presentations of themselves, their families and their school in French.

At the end of August and beginning of September, the French host students will revisit in Faaborg. Like their Danish counterparts, they will be staying with their host families and attend classes, wholly or partly conducted in English. Besides we want to show them some of our beautiful setting: one or two islands in the archipelago, the Arts Museum, and maybe an excursion to Odense.
